

DC HIGH VOLTAGE

DC High voltage test set 0-200KV@
Current as per customer requirement

Input-230vac (Single Phase) \pm 10%

Output-0-200KV.

Duty-15min on/15 min off

Control-motorized or manual.

Metering-DC secondary side.

Output-Nylone busing.

Set-2 part (above 90KV/10mA)

Protection-

1. Fuse input side
2. A fast acting relay in case of fault/ when current exceed the preset value.
3. zero start, timer reset & earth interlocking provided.
4. control panel air cooled.
HV Transformers air cooled.
Rectifier section are also air cooled.

Indication:

LT on, HT on/off, zero, max, DC.

Push button:

HT ON/OFF, Timer Start / Reset & push to Read mA

Tripping range:

DC-25%/50%/75%/100%.

Meter type :

DC kV meter, mA meter DC.

(size 48/96 or 96/96 Analog or digital type as customer required).

Resolution : 0.1 (Digital)

Timer digital type :- 999 sec. (48/48)

Accessories ;

Input lead 3meters.

Output lead 10meters.

Earthing lead 5meters.

Connecting lead 3meters.

Size of set.

Panel (510mm/400mm/350mm) \pm 10% (at 80KV)
