

OIL DI-ELECTRIC TEST SET

Input-230vac (Single Phase) \pm 10%
Output-0-60 KV,0-80KV, 0-100KV, 0-120KV.
Duty-15min on/15 min off
Capacity-0.6KVA TO 1.2KVA
Control-motorized or manual.
Metering-AC primary side.
Output-Raising casted type busing.

Protection-

1. Fuse input side
2. A fast acting relay in case of fault/ when current exceed the preset value.
3. zero start, cage door, over voltage, provided.
4. control panel & HV Transformers air cooled.

Indication:

LT on, HT on/off, zero.

Push button:

HT ON/OFF Increase/decrease.

Tripping range:
10mA.

Meter type :

AC kV meter, (size 96/96 Analog or digital type as customer required).

Resolution : 0.1 (Digital)

Accessories;

Input lead 3meters.
Oil cup with electrode
Earthing lead 5meters.

Size of set.

Panel (460mm/460mm/460mm) \pm 10%.
